Vision of Viksit Bharat (Developed Country)

- Towards the centenary of its independence in 2047, India is on the its journey with the vision of historic transformation of the nation into a fully developed, globally influential country—**Viksit Bharat**.
- This vision represents the culmination of over seven decades of progress and lays the foundation for the next phase of India's growth and development.
- It is a roadmap encompassing not only economic advancement but also sustainability, social inclusion, national security, and global leadership.
- Viksit Bharat, in other words, envisages the provision of social services to the masses of India, at the quality available to around 1.4 billion citizens of the developed countries.

United Nations SDGs adopted in 2015

SUSTAINABLE DEVELOPMENT GOALS

Satcom for Viksit Bharat

- As Mahatma Gandhi famously said, the decisions (especially by the Govt.) should be taken to benefit the last man in the queue.
- So in Viksit Bharat, no one should be deprived of social and economic goods and services, even though living in very far-flung, rural and remote areas.
- This is only possible through a comprehensive use of technologies and digital systems, e.g., e-governance, e-learning & skilling, e-commerce, e-agriculture, tele-medicine, etc.
- NTN technologies, especially Satcom, is only capable to provide universal coverage for providing such e-services.
- Satcom connectivity is also non-negotiable for seamless provision of Public Protection, Disaster Relief and Management, Transport and Fleet Management, safety and security, Ecology and Pollution management, Sustainable Development.

Thank You
